## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance: with respect to independent claims 1, 8 and 16, the prior art made of record teaches various configurations of a signal strength indicator circuit, for example see Wagemans (US 6,360,086), but do not teach a signal strength indicator circuit comprising a set of rectifiers including an asymmetric switching pair of rectifiers for providing an output signal that is inversely proportional to the input signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon but considered pertinent to applicant's disclosure includes Oida et al. (US 6,603,960) that discloses a simple and typical RSSI detector circuit for transmission output control, Wagemans (US 6,360,086), Brehmer et al. (US 5,875,390), Tanabe et al. (US 4,513,209) and Ishii (US 4,219,778).
